

At GK Machine we use CNC Lasers to Create... Awnings, Benches, Signs, Bike Racks, and More!

With CNC precision lasers GK Machine provides a very cost-effective method for manufacturing small to medium part orders made from flat sheet metal. Laser cutting technology has been widely using in manufacturing industries for a variety of parts, pieces and specialty products. GK Machine provides laser cut signs, artwork, awnings, bike racks, trash receptacles, park benches and more!

Laser Cut Signs

Laser cutting technology can easily and accurately cut metal signs. You may see metal signs and sign letters at a business store front or on entrance sign to a business park or other public location. This kind of laser cut product is clear, smooth and elegant. Laser cut sign letters can be customized with logos, lettering and in various shapes and sizes. Laser cut signs may be powder coated for extra durability.

Laser Cut Artwork

Laser cutting technology can be used to create artistic laser cut products. The precise cutting process helps make your innovative design ideas possible. Most artistic laser cut products can be used as outdoor decoration. Laser cut art has smooth adage, which is the reason why more and more people want to decorate their homes and businesses with this kind of laser cut artwork.

Laser Cut Trash Receptacles

Promote Your Team or Company and Build Your Brand with high-quality trash receptacles. May be used in almost any location and can be customized with your logo. These receptacles are perfect for city/county parks, public event centers, sports teams or anyone looking for a unique advertising idea. Custom artwork is displayed on front side only. Lockable lift off top makes servicing easy. The 55 gal. receptacle is available in a variety of powder-coated colors.

Metal Park Benches

GK Machine manufactures metal park benches that are perfect for city parks, school campuses, and more. Each bench is available with a variety of powder coating colors. The park bench is fabricated from durable steel with the option to add laser cut detailing directly into the bench sides.

Laser Cut Awnings

Laser cut sunshades are both functional and artistic. Use sunshades to create a dramatic entry or building facades. Added perforated patterns and laser cut designs to your project. GK Machine's designers can help you with a design or you can customize your own custom patterns.
